

A review concern can become stale after revision

RevTrack asks whether one concrete concern remains valid after aligning the review, response, and revised evidence.

Example: PIED: Physics-Informed Experimental Design for Inverse Problems (w7P92BEsb2__r01)

1

Extract issue

One reviewer concern

2

Align response

Find claimed fix

3

Check revision

Require paper evidence

4

Assign status

fixed / partial /
unresolved / regressed

5

Gate claims

Only evidence-backed
results
